

LSTM - Donors choose.

- ✓V1 - Intro to Celab
- ✓V2 - Case Study
- ✓V3 - Dataset
- ✓V4 - Data Analysis

presence of numerical digit column
boolean flag if project resource
summary has at least one num.
digit.

Also, show if there is a higher
chance of acceptance.

Data Analysis.

- 1) % of approved projects vs.
teacher prefix
- 2) % of approved projects vs.
School State
- 3) Countplot on project grade
Category
- 4) Countplot on project Subject
Categories

5) Countplot on project subject subcategories.

6) Approval percentage of previously posted projects vs.

teacher prefix

Other plots from 1. Reference notebook of EDA given by Applied AI.

→ Teacher No. of previously posted projects

temp~~1~~. groupby(by = 'Teacher_prefix',
axis = 'columns')

2 June 2021.

LSTM - Deep Learning
Donors' choose.

Aim: To complete Text Preprocessing. and watch video 5.

Motivation: Completion of Assignment # 27.

Strategy:

- 12:30 - 1 pm →
- ✓ Watch the entire video.
 - ✓ Download the dataset.
 - ✓ Prepare code + look for past code.
 - ✓ Complete by ~~1:45~~ 10pm in the night.

Result: Text Preprocessing done.

Video Notes of Text Preprocessing :

- $essay = e1 + e2 + e3 + e4$
- title
- Special characters $\backslash r \backslash n$ etc. when calling `df.head(2)`.
- We don't need punctuation marks and escape sequence.
- Decontracting $\rightarrow$ can't $\rightarrow$ cannot
 $n't \rightarrow$ not
- Standard decontracting operations code borrowed.
- Replacing $\backslash$ with ' ' space.
- Applying reg. exp. and remove special characters. We only want alphanumeric characters.
- check the final essays after preprocessing.
- Let Nan's remain there in the code.
- Preprocess Project title text also.

3rd June 2021

Task: 1

LSTM-Deep Learning
Donors choose

Aim: To prepare data matrix and watch video 6.

Motivation: Completion of Assignment # 27.

Strategy:

12-12:15pm - ✓ Watch the entire video.

✓ Use the preprocessed pickle file.

- Prepare code + look for past code.

- Complete by 1pm in the afternoon.

Result: Result was good. I achieved the task at hand on time (in afternoon).

Video Notes of Preparation of Data Matrix:

- Categorical data : School state
clean categories
OHE " Sub "
project grade category
teacher prefix

- Text data : project title
essay
project resource summary

BOW, TFIDF, AVGW2V, TFIDFW2V

- Numerical data : quantity
teacher no. of previously
posted projects
price.

- OHE → Count Vectorizer for Categorical data by Sklearn.
- min_df → Consider words which are present in atleast min_df = 10, 10 docs.
- OHE → Categorical and BOW
- AVGW2V → glove vectors.

3rd June 2012.

Task:2 LSTM-Donors Choose

AIM: To understand about Functional API in Tensorflow.

Motivation: Completion of Assignment #27.

Strategy:

7 to 10 pm ^{3rd June} ✓ Watch Video 3# - Functional API Tensorflow. - 15 min Video.

4th June

↓ X

5th June

✓

✓ Use the final data matrix and work as per explanation in the video.

• Understand and work towards completion.

Result: Goal Achieved ☒ 5th June.

Video Notes of Functional API Tensorflow

- Watch IRIS Functional API video.
- Follow through Tensorflow Website and read the content for both sequential and functional API.

Task:3 LSTM-Deep Learning Donors choose

AIM: To watch 3 videos and understand the assignment.

- Video 4: LSTM part 1
- Video 5: " " 2
- Video 6: " " 3

MOTIVATION: Completion of Assignment 27

STRATEGY: • Watch video 4, make notes

- " " 5, " "
- " " 6, " "

RESULT: Goal Achieved ☐

Video : LSTM Assignment part 1
Notes

Video : LSTM Assignment part 2
Notes

batch size = 1K.

glove vectors for text
trainable = false in embedding
layer for text.

→ Watch again after reading.
